TRUSTEE REPORT

To the Unitholders,

Directors of Principal Trustee Company Private Limited have the pleasure in presenting the Twenty First Annual Report along with the audited financial statements of the Schemes of Principal Mutual Fund for the Financial Year 2014-2015.

1. Scheme Performance, Future Outlook and Operations of the Scheme :

Performance as on March 31, 2015:

Principal Pnb Fixed Maturity Plan - Series B16 (A Close Ended Debt Scheme offering Fixed Maturity Plan of 1094 days)

Period	Date	Regular Plan [^]		Direct Plan [^]	
		Returns (%)	Crisil Short Term Bond Fund Index (%)	Returns (%)	Crisil Short Term Bond Fund Index (%)
Since Inception	30-Apr-14	N.A.	N.A.	N.A.	N.A.

[^]Growth Option

Note: As the scheme has not completed one year, the performance/returns for this scheme is not provided.

Most of the scheme(s) under the Fixed Maturity Plans since their inception have been in line with their benchmarks, whereas Principal Pnb Fixed Maturity Plan - Series B2 has outperformed its benchmark significantly. The same has essentially been on account of the scheme(s) being Fixed Maturity Plan(s) which required locking in investments till maturity of the Scheme(s) and better timing and stock selection.

Outlook and Operations of the Scheme:

a. Equity Market: While the economy through FY15 generally remained weak, there are some signs of a pick up. The sales of Commercial Vehicles, esp. Heavy CVs has shown an uptick in the past few months. Toll road operators say that traffic flow has picked up meaningfully on some stretches, not only in areas where mining is restarting, but even otherwise. There have been initial moves towards transmission of lower interest rates by the banks. However, it is key that the strength of corporate balance sheets improve as that is a necessary condition for a strong recovery in the capital expenditure cycle. We have seen some signs of that with asset sales in the infrastructure space.

Globally, the picture is mixed. The key event to watch out for would be the Fed raising rates and the markets' reaction to that as that can impact flows into EMs. Incrementally, stock markets in developed markets are doing better than those in EMs. However, India in some ways is better placed, as while the macros have improved, the markets now expect the micro (i.e. the company level) picture also to improve. This is not true of most EMs, which should benefit India as far as relative fund flows are concerned.

b. Debt Market: The key drivers for debt market in FY 2015-16 would be the RBI monetary policy stance, CPI Inflation trajectory, Banking system liquidity conditions and demand supply dynamics for Government Securities (G-Sec). RBI is expected to keep CPI inflation as the nominal anchor of monetary policy. If the trajectory of CPI inflation is in line with RBI projections (4% by Aug 15, and 5.8% by Mar 16), then we may see further rate cuts this year.

Global crude oil prices would continue to remain an important indicator in terms of fuel inflation, oil import growth and subsidy bill of government. Any fall in prices to below US\$50 per barrel on account of global growth concerns would be positive for debt market. Banking system liquidity is expected to remain in deficit mode in FY16 as well. Most of the deficit, though, would be financed through Term repo like FY15.

The supply of G-Sec in the first half of FY 2015-16 is 60% of the total dated G-sec borrowing programme of ₹ 6.00 lakh crores (in turn higher than ₹ 5.92 Lakh Cr of FY 2014-15). The government plans to conduct buyback (swap) of short tenor G-sec and issue fresh long dated G-sec of an equivalent amount this year as well, which may put pressure on long term G-Sec yields. The broad range for 10 year benchmark for financial year 2015-16 is likely to be 7.00%-8.00%.

Operations: Principal Mutual Fund (PMF) as at March 31, 2015 offers twenty nine Schemes. These include nine Equity Schemes (including two Equity Linked Savings Schemes), one Balanced Scheme, one Hybrid Scheme, one Fund of Fund Scheme (Overseas), nine Debt Schemes/

Plans including one Liquid Scheme, and eight Fixed Maturity Plans. The total assets under management across all these Schemes as on March 31, 2015 was ₹ 5027.22 Crore.

The AMC operates out of 11 branches, including Mumbai. Increased use of technology coupled with optimum allocation and utilization of resources has helped us to enhance operational efficiency at PMF. During the year, SEBI has introduced significant changes to the MF regulations which has impacted the industry as a whole. PMF has continued to modify its processes, wherever required, to remain compliant with the said regulations at all times.
