

The Golden Goose

In a far village, a farmer couple found a goose who used to lay a golden egg every day.

Getting a golden egg everyday made the farmer couple greedy.

**Do not be greedy**

Many investors make huge losses because of their greed and expectations of unreasonable high returns, just like the man who cut the goose to get all the golden eggs at a time. Always be realistic when it comes to your investments and invest as per your risk appetite and goals through transparent, well regulated and professionally managed products like mutual funds.
