

REPORT OF THE TRUSTEES TO THE UNITHOLDERS OF PRINCIPAL MUTUAL FUND

The Directors of the Trustee Company have pleasure in presenting before you the Annual Report of the schemes of Principal Mutual Fund for the year ended March 31, 2006.

OVERVIEW – EQUITY MARKETS

The following table gives the performance details of the key equity indices during the last financial year:

Indices	Performance
NSE Nifty Index	64.6%
NSE Midcap Index	63.6%
BSE 500 index	65.2%

The performance of the large capitalization indices (NSE Nifty) and the midcap indices was similar during the year. This was in contrast to the previous financial year when the midcap stocks as a group had outperformed the large cap stocks by a sufficient margin.

The movement in stock indices was upward and pretty uniform during the year, except in the month of October, when the broad markets fell about 9% during the month. Since that correction, however, while the markets rallied, the large cap stocks outperformed the mid cap stocks for the remainder of the year.

During the year, the sectors which showed a strong performance were cement, telecommunications, automobiles & auto parts, engineering and consumer goods. The sectors which under performed the broad indices during the year were software, banks and pharmaceuticals. Metal stocks were very volatile during the year, their prices moving based on global news flows. The BSE PSU index was another weak performer in the market.

During the financial year, there were continuous strong inflows for the FII's. The flows into domestic mutual funds were also much stronger during the year compared to last year.

Outlook for Financial Year 2006-2007

The equity markets have undergone a substantial period of correction since the peak in the second week of May and in mid-June are down nearly 30% from their highs. While other emerging markets have corrected too, the fall has been much sharper in India, as the valuations were higher in Indian markets.

Post this correction, markets currently trade at about 13 times forward earnings, which is below the average historical multiple the markets have traded at. The economy continues to show strong growth, though there are concerns emerging on inflation and higher interest rates. However, the long-term bottom up story for Indian equities; that of a domestic consumption theme, an efficient and competitive corporate sector, the outsourcing story and infrastructure spending remains in place. We expect that equity will remain the best performing asset class for investors over the next 3 years.

DEBT MARKETS DURING FINANCIAL YEAR 2005-06

2005-06 was a continuation of a trend of the previous year. Equity remained strong and debt remained weak. Equity markets performed well due to global liquidity finding its way in emerging market equities, and debt markets suffered from tightening in domestic liquidity due to IMD repayments to the tune of USD 7.1 bn and lack of Government spending, especially during the second half of the year. Central bankers across the globe increased rates in order to reduce surplus liquidity and remove the accommodative stance of the monetary policy. Yields inched up during the year on a net basis, moving higher by 75-100bps across the sovereign curve. Corporate spreads too widened thereby increasing the cost of funds for domestic borrowers. Investors remained in the relative safety of cash funds largely and the issuance of fixed maturity plans increased during the year.

Performance of Fixed Income Funds during 2005-06

FY2005-06 was another challenging year for fixed income fund managers. Yields kept rising, impacting adversely the debt fund performance. Hybrid funds with equity exposure registered strong performance on back of buoyant stock markets. Investors continued to switch from long duration funds to cash funds and floating rate funds. The Short Term Fund gained in corpus during the first half of the year but saw large redemptions in the second half as liquidity dried up pushing short term yields higher.

Monthly income plans emerged best performing category of funds during the year, with Principal MIP and MIP Plus returning 8.58% and 12.62% returns. Among our institutional plans, **Principal STP** generated 1-yr returns of 5.3%, as the portfolio was invested in assets with an accrual focus and minimal duration risk. **Principal Income Fund** generated 1-yr returns of 4.55% against benchmark returns of 3.30%. **Principal Cash Management Fund - Liquid Option - Institutional Premium Plan** generated 5.75% for the year while floating rate funds like **Principal FR-SMP** and **FR-FMP** generated 5.48% and 5.58% respectively. The **Gilt Funds** generated positive 4.43%-5.53% returns, in spite of an adverse interest rate environment.

Our funds had another year of good performance; maintaining top quartile performance across most fund categories. The year also saw our performance being recognized by mutual fund evaluating agencies for consistent and superior fund performance-

- **CNBC TV18 -CRISIL** ranked **PRINCIPAL INCOME FUND** among the two best performing Income Funds based on its CRISIL CPR methodology for 2005. The Fund received the award for the second year in a row.
- **ICRA-ONLINE** ranked **PRINCIPAL GOVERNMENT SECURITIES FUND-INVESTMENT PLAN** as the best performing Government Securities fund.

Outlook for Financial Year 2006-07

We expect Central bankers across the globe to increase rates in order to remove accommodation and reach neutral rates during the year. Higher commodity prices and sustained economic recovery are likely to lead to build-up in inflationary pressures across

economies. We expect Central bankers to take a pause and stop raising rates sometime during the year in order to assess the macroeconomic conditions and evaluate the need for higher real rates in order to prevent overheating.

Nominal interest rates are likely to rise during the initial part of the year and then peak out during latter part as the incessant rate hikes come to temporary halt. Domestic inflation is likely to inch up as the impact of high crude prices is passed on to the domestic markets.
