Features of SMART: (Refer Instruction B16)

- Smart Trigger Enabled Plan ("SMART") is a unique feature that enables investors to invest in the Scheme in a staggered manner. Investors can opt for this facility only during the NFO Period of the Scheme.
- Minimum Investment amount under the SMART Facility is ₹ 25,000/-. Investment for an amount of less than ₹ 25,000/- will not be eligible for the SMART Facility and will be considered under the Lump Sum purchase option.
- Investors should provide the duly completed 'SMART Facility Form' along with a cheque drawn in favor of "Principal SMART Facility", to be eligible to invest in this Facility.
- Through SMART Facility investors can spread their investments equally over 4 monthly instalments, wherein the initial 25% of the investment amount will be considered upfront in the NFO of the Scheme and the remaining 75% can be invested under Principal Cash Management Fund – Growth Option as per the Applicable NAV on the day preceding the date of allotment of Principal Large Cap Fund.
- Post the closure of the NFO of the Scheme, the amount invested in Principal Cash Management Fund shall be switched into the Scheme in 3 equal monthly instalments which will be triggered on the basis of 3% fall in the Nifty 100 TRI on a monthly basis which will be calculated based on the value of the index on the date of initial allotment.
- In case the above trigger does not occur in any month, 25% of the amount invested during the NFO period will be switched to the Scheme on the last business day of that month.
- Only one Switch will be triggered in a month.
- In case of the last instalment under the SMART facility, the entire balance units available in the Principal Cash Management Fund will be switched in to the Scheme in line with points 5-7 above.
- Units will be allotted in the Scheme at the applicable NAV prevalent on the date of the switch.
- A new folio will be created for investments received from new investors as well as investors who already have previous investments under selected source Scheme.
- In case of redemption of units under source scheme during the tenure of the SMART Facility, the amount / number of instalments to be switched would stand reduced to the extent of the amount redeemed or in case of full redemption, the facility will be discontinued.

However, if the value of the index does not fall by 3% till the last business day of Nov 2020, then 25% will be switched to Principal Large Cap Fund on the last business day of Nov 2020.

Scheme Name	Principal Large Cap Fund	Principal Nifty 100 Equal Weight Fund						
Investment Objective	To achieve long term capital appreciation by investing in a diversified portfolio predominantly consisting of equity and equity related securities of Large Cap companies including derivatives. However, there can be no assurance that the investment objective of the Scheme will be achieved.	To invest principally in securities that comprise Nifty 100 Equal Weight Index and subject to tracking errors endeavour to attain results commensurate with the Nifty 100 Equal Weight Index.						
Asset Allocation Pattern	Under normal circumstances, the funds of the scheme shall be invested as per the asset allocation table given below:			Under normal circumstances, the funds of the scheme shall be invested as per the asset allocation table given below:				
	Type of instrument	Normal Allocation (% of Net Assets)		Risk Profile High/Medium /Low	Type of instrument	Normal Allocation (% of Net Assets)		Risk Profile High/Medium /Low
		Minimum	Maximum			Minimum	Maximum	
	Equity and equity related instruments of Large Cap Companies	80	100	High	Nifty 100 Equal Weight Index Stocks	95	100	High
	Equity and equity related instruments of Other Companies	0	20	High	Money Market Instruments	0	5	Low
Debt and Money Market Instruments including units of debt & liquid schemes	0	20	Low to Medium	The Asset Management Company reserves the right to invest in derivatives up to 50% of the net assets of the Scheme. Subject to the SEBI Regulations, the Mutual Fund may deploy upto 20% of its total net assets of the Scheme in Stock Lending.				
<p>The Scheme will invest predominantly in Equity and Equity Related Instruments of Large Cap companies.</p> <p>Investment in foreign securities shall not exceed 20% of the net assets of the Scheme.</p> <p>The cumulative gross exposure to equity, equity related instruments, debt, money market instruments and derivatives shall not exceed 100% of the net assets of the scheme. However, cash or cash equivalents with residual maturity of less than 91 days shall be treated as not creating any exposure.</p> <p>The exposure to derivatives will not exceed 50% of the net assets of the scheme.</p> <p>The Scheme may invest up to 50% of the scheme's debt exposure in domestic securitized debt.</p> <p>The Scheme does not seek to participate in repo/reverse repo in corporate debt securities.</p> <p>The Scheme does not seek to participate in credit default swaps.</p> <p>The Scheme may engage in short selling of securities in accordance with the framework relating to short selling and securities lending and borrowing specified by SEBI.</p>								

Scheme Name	Principal Large Cap Fund	Principal Nifty 100 Equal Weight Fund
Asset Allocation Pattern (Contd.)	<p>Not more than 20% of the net assets of the scheme can be deployed in stock lending. The scheme would limit its exposure, with regards to securities lending, for a single intermediary, to the extent of 5% of the total net assets of the scheme at the time of lending.</p> <p>Due to market conditions, the AMC may invest beyond the range set out above. Such deviations shall normally be for a short-term purpose only for defensive considerations and such deviation shall be subjected to 30 calendar days rebalancing period. Further, in case the portfolio is not rebalanced within the period of 30 days, justification for the same shall be placed before the investment committee and reasons for the same shall be recorded in writing. The investment committee shall then decide on the course of action.</p>	
Investment Strategy	<p>The strategy would endeavor to build a diversified portfolio of large cap companies across sectors. The universe for the large cap companies would be defined according to the extant SEBI guidelines. The stock selection process would follow a combination of a bottom up and top down approach with a focus on the fundamentals, current valuations and the growth potential of the company. The companies selected would have a robust business model and enjoying sustainable competitive advantages as compared to their competitors. The scheme identifies companies through rigorous fundamental analysis, proprietary research and support from a global network of experienced research resources. The fund may also invest upto 20% of the portfolio in foreign large cap companies.</p>	<p>The scheme has been designed with the intention of tracking the movement of securities (from time to time) included in the Nifty 100 Equal Weight Index. The Scheme plans to do this by investing the entire corpus in the stocks that comprise the Nifty 100 Equal Weight Index in weights similar to the weightage given by Nifty 100 Equal Weight Index so that the portfolio would appreciate or depreciate (subject to tracking errors) more or less in the same manner as the Nifty 100 Equal Weight Index.</p> <p>Subject to the requirements of cash flows to meet the recurring expenses and to service investors who decide to exit from the Scheme or for distribution of income, if any, to investors, it is proposed that the corpus of the scheme will be invested in the Nifty 100 Equal Weight Index securities. It is also proposed that disinvestment will take place only when investors exit from the Scheme or when any security ceases to be included in the Nifty 100 Equal Weight Index or to meet the cash flow requirements.</p> <p>The NIFTY100 Equal Weight Index comprises of same constituents as NIFTY 100 Index (free float market capitalization based Index). The NIFTY 100 tracks the behaviour of combined portfolio of two indices viz. NIFTY 50 and NIFTY Next 50. Each constituent in NIFTY100 Equal Weight Index is allocated fixed equal weight at each rebalancing.</p> <p>The Nifty 100 Equal Weight Index is at present being managed by IISL.</p>

Differentiation	Principal Large Cap Fund will invest predominantly (atleast 80% of the portfolio) in large cap companies that trade at attractive valuations.	The scheme is a passively managed index fund, which would invest in all the stocks comprising Nifty 100 Equal Weight Index in the similar proportion as their weightage in the index.
