

Principal Credit Risk Fund^{£^}

An Open-ended Debt Scheme Predominantly Investing In AA And Below Rated Corporate Bonds (Excluding AA + Rated Corporate Bonds)

August, 2020

To generate income and capital gains by predominantly investing in a portfolio of AA and below rated corporate debt securities across the credit spectrum within the investment grade.

Why Invest?

- The fund will predominantly (minimum 65%) invest in AA and below rated corporate debt securities with high accrual.
- Endeavors to generate alpha through appropriate credit selection rather than calls on interest rates movement.
- The fund aims to tap mispriced credit across the credit spectrum with or without rating migrations*
- The fund is suitable for Investors seeking for
 - asset allocation across various asset classes and have credit risk appetite but low duration appetite can look to Invest in this fund.
 - capital conservation with reasonable income accrual along with low interest rate volatility, based on lower weighted average maturity of the portfolio.
- The fund is suitable for the investor with over 1-3 years investment horizon.
- The Portfolio Current Gross YTM as on July 31, 2020 is 3.44%.

*Upgrades/Downgrades may or may not provide the alpha as markets are efficient to some extent. However, opportunities may exist for mispriced credits (for example, new capital market issuers, size of issue, credit enhance structures, regulatory changes etc.). The investment strategy stated above is the current strategy and may change from time to time without any notice and shall be in accordance with the strategy as mentioned in the Scheme Information Document of the scheme.

Performance of Scheme (as on July 31, 2020)

% Return

\$Point to Point (PTP) Returns (₹)

Past performance may or may not be sustained in future. Different plans shall have a different expense structure. The performance details provided herein are of Regular Plan-Growth option. Returns (in %) are calculated on Compounded Annualised Basis (CAGR). ³ PTP (Point to Point) Returns are based on standard investment of 10,000/- made at the beginning of relevant period. Performance of the dividend option for the investors would be net of dividend distribution tax, as applicable.
