

Principal Low Duration Fund

An Open Ended Low Duration Debt Scheme Investing In Instruments Such That The Macaulay Duration Of The Portfolio Is Between 6 Months And 12 Months*

*Please Refer Page No. 24 of SID on which the concept of Macaulay's Duration has been explained.

An opportunity to do more with your money !

November, 2020

Why should you invest

- This Fund comes under the Low Duration Category, with Macaulay Duration range of 6 month-12 month.
- The Fund tries to take advantage of the steepness of the curve.
- Steepness of the curve is the increase in yields from 2 month vs 12 month vs 24 months' papers.
- The mark-to-market component of the fund is managed within defined maturity profile of the scheme. Thus the investors know in advance the risk profile of the Fund and can suitably invest for appropriate investment horizon.
- The Fund has stringent liquidity and credit risk parameters to optimize the risk-return proposition for the investors.

Outlook

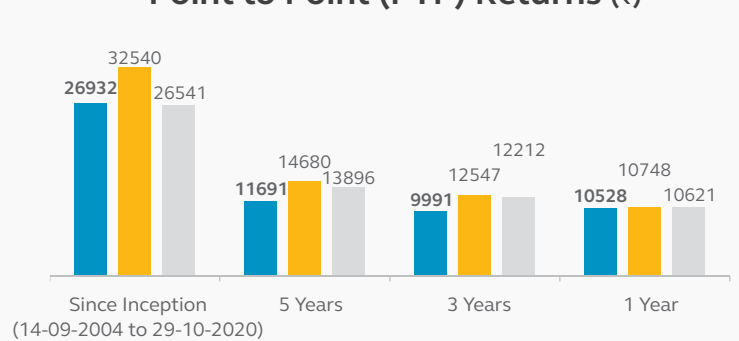

The fund continues to maintain a high quality portfolio with exposures primarily to AAA/AA+ corporate bonds, 1-2 yr sovereign gilts, T bills and CD/CPs. Given the low money market yields we are keeping Macaulay Duration towards the lower end of the spectrum of 6 to 12 months but will increase it on suitable opportunities in the 6month to 2 yr space.

Performance of Scheme (as on October 29, 2020)
